

# Medication Adherence

At WellCare, we strive to optimize adherence to our members – your patients. We appreciate your commitment to their positive healthcare experience and everything you do to deliver quality care.

## Quality Measures

Below are three examples of Centers for Medicare and Medicaid Service Star measures which use adherence to evaluate health plans.

Beneficiaries, ages 18 years and older, who had at least two fills of medication(s) listed below on different dates of service and were 80% or more adherent to their medications.

Quality Measure	Description
Medication Adherence for Diabetes (DIAB)*	Oral antidiabetic medications defined as Biguanides, Sulfonylureas, Thiazolidinediones, DPP-IV inhibitors, GLP-1 receptor agonists, Meglitinides, and SGLT2 inhibitors
Medication Adherence for Hypertension (RASA)**	Renin-Angiotensin System (RAS) antagonists defined as ACE inhibitors, ARBs, or Direct Renin Inhibitors
Medication Adherence for Cholesterol (Statins)	Statins

## Exclusions

End-stage renal disease (ESRD), Hospice, \*Insulin use (DIAB only), \*\*Sacubitril/Valsartan use (RASA only).

(continued)

For more than 20 years, Wellcare has offered a range of Medicare products, which offer affordable coverage beyond Original Medicare. Beginning Jan. 1, 2022, our affiliated Medicare product brands, including Allwell, Health Net, Fidelis Care, Trillium Advantage, 'Ohana Health Plan, and TexanPlus transitioned to the newly refreshed Wellcare brand. If you have any questions, please contact Provider Relations.

## Medication Adherence

Use this tip sheet for best practices, and how to talk to your patients about why they need to maintain adherence and how to track medications.

Patient barriers	Talking points
<b>Medications cost too much.</b>	Check for medications in a lower tier on formulary.
<b>Can't remember to refill their medications.</b>	Talk to your patients about how they can enroll in a refill reminder program with their pharmacy. If a patient has a smart device, have them add calendar reminders (alerts) for medication refills.
<b>Hard to get to the pharmacy.</b>	Have the patient check if their pharmacy offers delivery service. Ask the patient to check with family members or a caregiver for help.
<b>Too many medications to track.</b>	Ask the patient's pharmacy to synchronize medications so they are all filled on the same day. Encourage the use of a pillbox or phone alarms to help patients take their medications each day at the correct time.

### Best practices to promote medication adherence

#### Prescribe 90-day prescriptions supply

For chronic medications, prescribe a 90-day quantity.

#### Review medications regularly

During each visit, review all medications with the patient.

When possible, remove medications no longer needed and reduce dosages.

#### Check for understanding

Make sure your patients knows why you are prescribing a medication.

Clearly explain what they are, what they do and how to manage potential side effects.

Home Delivery through CVS Caremark.<sup>®</sup> CVS Caremark is currently our preferred home delivery service. Prescribers can fax or e-prescribe member prescriptions to CVS Caremark. Please use the prescription form and contact information listed below:

[www.caremark.com/portal/asset/NewRX\\_Fax\\_Form\\_v91.pdf](http://www.caremark.com/portal/asset/NewRX_Fax_Form_v91.pdf)

Fax: **1-800-378-0323**

E-prescribe to CVS Caremark Mail Order Electronic, NCPDP ID 322038

Members must create an account with CVS Caremark online or by telephone at:
